## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hughes (U.S. Patent No. 6,275,223).

As to claim 1, Hughes teaches a user assistance system for providing user assistance in connection with procedures associated with the operation of a computer program running on a computer system, each of said procedures comprising in interrelated series of steps, with one of the steps being a currently-selected step, said user assistance system comprising:

a client area displaying information pertaining to the currently-selected step (col. 3 lines 38-43); and

a navigator bar adjacent to said work area (figs. 7-10, 15, and 17), said navigator bar displaying a visual representation of said interrelated series of steps associated with said currently-selected step (lines of code 1801 and 1802 of fig. 18 show the corresponding with each line of code of fig. 17 above).

Art Unit: 2174

As to claim 2, Hughes teaches the user assistance system of claim 1, wherein said navigator bar is dividable into segments, with each segment corresponding to one of said steps of said interrelated series of steps (figs. 15).

As to claim 3, Hughes teaches the user assistance system of claim 2, wherein said visual representation of said interrelated series of steps displayed by said navigator bar includes a display of future steps not yet performed by said computer program (Next icon of fig. 15).

As to claim 4, Hughes teaches the user-assistance program of claim 3, wherein said future steps comprise the most likely steps to be traversed for the procedure associated with the interrelated series of steps being displayed (Previous icon of fig. 15).

As to claim 5, Hughes teaches the user assistance system of claim 4, wherein said visual representation of said interrelated series of steps displayed by said navigator bar further includes:

past steps already performed by said computer program (first source code, col. 12 lines 23-37 and fig. 15); and

the currently-selected step (directly compare, col. 12 lines 34-37).

As to claim 6, Hughes teaches the user assistance system of claim 5, wherein said segments include active segments and inactive segments (demonstration 1.1 and 1.2 of figs. 15), and wherein selection of an active segment changes the currently-selected step to the step corresponding to said selected active segment (col. 12 lines 3-60).

As to claim 7, Hughes teaches the user assistance system of claim 6, wherein said navigator bar displays said segments in a serial manner, and wherein said navigator bar can be scrolled to allow viewing of segments preceding or following said segment corresponding to said currently-selected step (scroll, col. 12 lines 51-61).

Art Unit: 2174

As to claim 8, Hughes teaches the user assistance system of claim 7, wherein the action of scrolling said navigator bar does not change the information being displayed in said client area (col. 12 lines 51-61, figs. 15 and 17).

As to claim 9, Hughes teaches the user assistance system of claim 8, wherein said information displayed in said client area comprises a selectable list of alternative choices for subsequent steps to be taken by said computer program (Annotation of figs. 17-18).

As to claim 10, Hughes teaches the user assistance system of claim 9, wherein selection of one of said alternative choices causes said display of future steps not yet performed by said computer program to change to a display of said future steps associated with said selected alternative choice (before source code is implemented, col. 15 lines 32-42 and figs. 17-18).

As to claims 11-20, they are method claims of system claims 1-10. Note the rejections of claims 1-10 above respectively.

### *Conclusion*
